

PUBLIC WORKS DEPARTMENT

CONSTRUCTION NOTICE

Newport Blvd-Balboa Blvd Traffic Signal Synchronization Project (C-6078)

The Newport Boulevard-Balboa Boulevard Traffic Signal Synchronization Project (TSSP) is scheduled to begin Monday, April 13 2015. The work adjacent to your property may be intermittent and should be completed in approximately 10 days.

Construction will begin on Monday, April 13 2015 and continue to July 1. The majority of the construction is planned to be completed prior to June 1, while other construction will be phased to avoid conflicts with Newport Elementary School.

The Newport Boulevard Traffic Signal Synchronization Project is a cooperative project between the City of Newport Beach, City of Costa Mesa, and the Orange County Transportation Authority (OCTA). The majority project is grant funded through the OCTA Measure M2 program.

This project plans to improve the flow of traffic along Newport Boulevard from Bristol Street to Main Street through traffic signal equipment and timing improvements. Construction within Newport Beach includes installation of new fiber optic communication lines in new conduit to be located in the sidewalk, new traffic signal control equipment, and evaluation of the traffic signal timing on the Peninsula.

Normal working hours are limited to 7:00 a.m. to 5:00 p.m., Monday through Friday. To reduce the impact to residents, businesses and traffic, construction requiring prolonged lane closures or traffic signal outages will be restricted to off-peak hours.

During this project, traffic restrictions and sidewalk closures at/adjacent to the work locations may be required on days that work is to be performed. "No Parking, Tow-Away" signs will be posted to warn that vehicles parked within the construction area will be towed away on work days. We request that you observe these restrictions and any other traffic controls in the area.

Exercise caution when driving, cycling and/or walking through the construction zones. Additionally, heavy equipment and construction materials tend to attract the interest of small children. Please instruct children to stay clear of all construction activities to avoid the potential for injury. Most importantly, notify us of any problems so that we can respond accordingly.

Your cooperation in making this project successful is greatly appreciated. Should you have any questions or concerns, please feel free to call:

Tyler Martin, Contractor	(626) 813-6693
Frank Martin, PW Project Inspector	(949) 270-8132
Eric Loke, Project Manager	(949) 644-3336
